

LET'S DO THIS TOGETHER

Set up by Transition Malvern Hills the Malvern Community Energy Co-operative is planning to install solar panels on the Malvern Cube roof.

The panels will provide electricity to the Cube at a greatly reduced price and sell electricity to the local grid.

The Co-operative will also benefit for 20 years from the government feed in tariffs (FITs). This is an opportunity for YOU to INVEST. We expect to have the SHARE OFFER DOCUMENT available in February 2014.

To find out more about this local green community investment please register your interest at
