JUNE

WHAT IS A TRANSITION INITIATIVE - WHAT'S THAT ABOUT? FILM, PRESENTATION AND DISCUSSION

MON 9 19.45 - 21.45

Find out more about the Transition movement and what is happening in your community of Malvern. All industrialised countries appear to operate on the assumption that our high levels of energy consumption, our high carbon emissions and our massive environmental impact can go on indefinitely. And most developing countries appear to aspire to these ways of living too. However, any rational examination of our energy supplies, our economic inequalities, our diminishing levels of well-being, our ecological crises and the climate chaos that is already hitting millions of people tells us this can't go on much longer. We're saying that the best place to start transitioning away from this unviable way of living is right within our own communities, and the best time is right now.
